Feedback Submission Page

Welcome to the Feedback Submission Page for our Travel App! This page allows users to provide their valuable feedback and reviews after completing their stay or travel experience using our app.

How It Works

1. **User Experience**: Users are redirected to this feedback submission page after finishing their stay or travel experience through our app.

2. **Feedback Form**: Users can use the feedback form to share their thoughts and experiences.

3. **Information Collection**: The form collects essential information, including the user's name, email, location visited, hotel stayed at, an overall satisfaction rating, date of travel, and a detailed review.

4. **Submission**: After filling out the form, users can submit their feedback.

5. **Acknowledgment**: Upon successful submission, a "Thanks for submitting your feedback!" message is displayed.

MY CONTRIBUTION

Users who have completed their stay or travel experience using our app will automatically be redirected to this page for feedback submission.

You can customize this feedback submission page to match your app's branding, style, and specific feedback requirements. Make changes to the HTML and CSS as needed

Client-side Validation for Email Input:

   - Implemented client-side validation for the email input field. This ensures that users provide a valid email address format before submitting the form. It helps in improving data accuracy and reducing potential errors.

   2. **Enhanced Styling for a User-Friendly Look**:

   - Improved the visual design and styling of the page to create a more user-friendly and appealing interface. This includes fine-tuning colors, layouts, and overall aesthetics to enhance the user's experience.

3. **Improved Formatting and Organization**:

   - Enhanced the code's formatting and organization for better readability and maintainability. Proper indentation and commenting were used to make the code more accessible to other developers who may work on it in the future.

4. **Enhanced User Experience with Feedback upon Form Submission**:

   - Added a feature that provides immediate feedback to users upon submitting the form. After submission, users will see a "Thanks for submitting your feedback!" message, which enhances the overall user experience and confirms that their feedback has been received..
